

U-Bracket Mounting Kit

Product Description

The U-Bracket Mounting Kit allows for ± 115 degrees of rotation to adjust the coverage angle for wall and ceiling-mounted installations. When the F1 Model 812 Passive loudspeaker is mounted horizontally, use the flexible array to adjust the horizontal coverage pattern for each loudspeaker by up to 40 degrees, and the U-bracket to adjust the vertical mounting angle and direct the loudspeaker's 100 degrees of vertical coverage. This vertical and horizontal flexibility maximizes coverage with each loudspeaker and supports asymmetrical configurations to reduce side wall reflections and improve clarity.

You can also mount the F1 Model 812 Passive loudspeaker vertically, using the flexible array to adjust the vertical coverage pattern and the U-bracket to adjust the horizontal mounting angle.

The Bose® logo on the loudspeaker can be adjusted for horizontal mounting.

For complete safety and installation instructions, see the U-Bracket Mounting Kit Installation Guide included with the mounting kit (Product Code 736453-0110).

Key Features

- Fits F1 Model 812 Active and Passive loudspeakers
- Horizontal or vertical mounting of Loudspeaker
- $\pm 115^\circ$ of rotation to adjust the coverage angle
- Single axis point provides easy rotational adjustment
- Attaches to the M8 threaded inserts in the top handle and the F1 Stand Mount Interface inserts

Technical Specifications

Mechanical		
Wall plate	67.7 cm x 15.2 cm (26.6" x 6.0")	
Material	Steel	
Maximum load capacity	22.6 kg (50.0 lb)	
Wall clearance	7.7 cm (3.0") at 0° position shown	
Weight	6.1 kg (13.5 lb)	
General		
Compatible with	F1 Model 812, F1 Model 812 Passive	
Product code	736453-0110 – U-Bracket Mounting Kit, Black	
U-Bracket Ranges		
Speaker Orientation	Tilt/Pitch	Pan/Yaw
Horizontal wall mount	$\pm 115^\circ$	N/A
Vertical wall mount	N/A	$\pm 115^\circ$
Horizontal ceiling mount	$\pm 115^\circ$	N/A
